

Clinical workshop of biofilm related infections

To bridge from basic science to clinical implementation

Wednesday June 26th, 2024

Location: The 'Seminarrummet', at Afdeling for Klinisk Biokemi, 3.01.1.

Organizer Claus Moser

Program

9:00 - 9:15	Welcome and short introduction <i>Claus Moser, Department of Clinical Microbiology, Rigshospitalet</i>
9:15 - 10:00	Cystic fibrosis and the clinical biofilm revolution <i>Niels Høiby, Department of Clinical Microbiology, Rigshospitalet</i>
10:00 - 10:45	Chronic wounds <i>Klaus Kirketerp-Møller, Department of Copenhagen Wound Healing Center, Bispebjerg Hospital</i>
10:45 – 11:15	Break and coffee
11:15 – 12:00	Osteosynthesis and prosthesis related osteomyelitis <i>Hans Gottlieb, Department of Orthopedic Surgery, Herlev Hospital</i>
12:00-13:00	Lunch
13:00-13:45	Enteral failure and parenteral nutrition through tunneled CVC <i>Palle Bekker Jeppesen, Department of Medical Gastroenterology and Hepatology, Rigshospitalet</i>
13:45 – 14:30	Endocarditis and cardiac prosthesis infections <i>Henning Bundgaard, Department of Cardiology, Rigshospitalet</i>

14:30 – 15:00

Break and coffee

15:00 – 15:45

Biofilms in the laboratory of Clinical Microbiology

Claus Moser, Department of Clinical Microbiology, Rigshospitalet

15:45 – 16:00

Remarks?

Aim: To improve the understanding of the clinical everyday real life presented by specialist in the clinical syndromes selected for this workshop. To bridge basic science to the relevant clinical problems.

To stimulate discussions on how to cross the valley between basic science to the clinical world and opposite. Clarify possible issues challenging to learn from published data only – confer with the clinicians actually facing the patients with biofilm infections.

The clinicians view on, what is needed for setting up clinical testing and what is needed to have methods/treatment strategies/new treatment candidates implemented in the clinical practice.
