

Program for small, direct supervision for biofilm projects at EUROBIOFILMS 2024.

- Taking place during the lunch break on Thursday June 27th.
- Will be carried out in small groups of 5-7 participants and lead by an experienced biofilm researcher within a specific area.
- The 'group leader' will have specific questions prepared to stimulate the setting. But we encourage the participants to be active to initiate discussions.
- 16 groups in total.
- Sign up in advance to avoid crowding.

Group leader	Biofilm issue
1. Niels Høiby*	What biofilm testing can you expect of the clinical microbiological department?
2. Tim Tolker-Nielsen*	Biofilm Control
3. Thomas Bjarnsholt*	Advanced technology in biofilm research?
4. Oana Ciofu*	Antibiotic augmenting possibilities
5. Klaus Kirketerp-Møller*	Involving the clinician in biofilm research?
6. Zhijun Song*	Testing anti-biofilm effect of new compounds including traditional Chinese medicine
7. Peter Østrup Jensen*	Immunology and biofilms?
8. Gordon Ramage*	Setting up yeast and mould biofilm research
9. Mette Burmølle*	Biofilms and bacteriophage effect?
10. Antonio Oliver*	Biofilm antibiotic susceptibility testing.
11. Rikke Meyer*	Setting up in vitro biofilm models?
12. Kendra Rumbaugh*	Pitfalls in establishing animal models for biofilm research?
13. Akos Kovacs*	Sociomicrobiology of biofilms
14. Phil Stewart*	Innate Immunity in Biofilm Infection
15. Elisa Borghi*	Insect models for biofilm research
16. Maria Dolores Macia Romero*	Biofilm Tolerance and Resistance to Antibiotics
